- First test with digital part of Hybrid 5 successfully done
 - Tests of Hybrid 5 with full set of voltages showed issue with sense wires / calibration / channel assignment
- Investigations ongoing, expecting an empty Hybrid 5 soon

Availability of PS Units:

- 2 units with 16 channels each
- A 3rd Demonstrator unit with ETH interface and 4 channels would be available with moderate work

Current assignment:

- Hybrid tests by TUM (Igor, Dima) → After Ringberg
- EMCM tests → After Ringberg++

What are the needs for slow control integration?

- Hardware requirements?
- Where is the test conducted?
- When?
