

- Bonn test beam at DESY (23rd - 29th March 2015)
Dedicated Bonn-CMOS test beam but open for parasitic users
Last minute decision for EMCM (system), Hybrid 5.0 (gated), ...
X0 investigations.
- SVD test beam at CERN (3rd - 16th June 2015)
SVD test beam in H6A and H6B lines at SPS. Telescope available.
Investigations on the induced noise observed a year ago in PXD+SVD. (t.b.d)
- PXD test beam at DESY in Q4 2015 (t.b.c)
Baseline: Pilot run PXD9 on Hybrid7, water cooling. Sensor investigation.
- VXD test beam at DESY in in Q1 2016 (t.b.c)
Combined test beam with everything, aka 'The Grandmother of all test beams'
