

# The Future of Research on Cosmic Gamma Rays

## Thursday, 27 August 2015

### Current results & facilities 2 (09:00 - 12:15)

-Conveners: Emilio Molinari

| time  | [id] title   | presenter                   |
|-------|--|-----------------------------|
| 09:00 | [22] FACT - Alerts from TeV Gamma Rays in the Context of Multimessenger Astrophysics | Dr DORNER, Daniela          |
| 09:30 | [23] Microlensing and emission region size for gravitationally lensed VHE sources    | Dr VOVK, Ievgen             |
| 09:50 | [35] VHE sources and intergalactic magnetic fields                                   | Dr VOVK, Ievgen             |
| 10:10 | Coffee break   |                             |
| 10:35 | [24] Extragalactic Background Light: status report                                   | Prof. FRANCESCHINI, Alberto |
| 11:05 | [26] Fermi-LAT detection of gamma-ray pulsars above 10 GeV                           | Dr SAZ PARKINSON, Pablo     |
| 11:35 | [25] Multi-TeV to PeV gamma-ray astronomy: motivation and strategies                 | Dr TLUCZYKONT, Martin       |
