# Belle II Tracking: Validation Discussion

F2F Tracking Meeting 2015 - Karlsruhe

Thomas Hauth │ 1. September 2015

INSTITUTE OF EXPERIMENTAL NUCLEAR PHYSICS (IEKP)

Validation Discussion

SKIT
Karlsruhe Institute of Technology

Recent changes:

- Running the SVD/VXD-Track finder with the tracking validation scripts (but detailed hit analysis still missing)
- Added VXD-CDC Merging validation by Benjamin

Discussion items:

- Use centrally-generated (in validation package) generic BBar for most of the validation scripts
- Combine more VXD-CDC merger validation plots in one ROOT-File (atm. 7 distinct files)
- Add reference plots for the CDC track finders ?!?
