

Coordination and Structure of B2GM

Peter Krizan is new Co-Technical Coordinator (together with Yutaka Ushiroda)

Peter's main tasks:

organization of the B2IM and B2GM meetings

Two deputies:

Shuji Tanaka (IR and VXD)

Ichiro Adachi (outer detectors)

New structure in effect for the coming B2GM

Peter is asking for suggestions concerning Time Table:

Peter's comments to the B2GM structure (copy from his email):

1) Preparation of the timetable: it is of course impossible to make a timetable without conflicts, so some choices have to be made. The present plan for this meeting is:

- to more or less keep the structure of the previous meeting
- to try to run all detector systems in parallel to leave more time for (almost) plenary discussions of topics of general interest for subsystems (trigger, daq, some selected software topics); PXD and SVD will be done sequentially.
- to shorten the plenary subsystem presentations, and ask the presenters to concentrate on the essentials that should be communicated across the collaboration.
- as we are nearing the installation of further subsystems, the integrations issues will become more important, and we expect longer presentations by the integration coordinators.
- to try to run some sessions with very little overlap with detectors in parallel to the detector plenaries (e.g. distributed computing).

B2GMs & PXD Parallel Session

Clear pattern of B2GM Meetings: Feb, June, October
2 B2GMs are accompanied by BPAC meetings (Feb and Oct)

B2GM generally preceded by a preparatory VXD Meeting in Europe

Parallel PXD session at B2GM becomes less important for inter-DEPFET-collaboration information (modulo brand-new results),
- should be used for rehearsals of plenary/BPAC presentations

Plenary talks for the Belle II collaboration (test, assembly, installation) become essential for inter Belle II communication

all PXD conveners should be present at the B2GM meetings
with follow-up VXD meetings and important satellite meetings

October B2BM and BPAC

General structure of BGM/B2GM:

BGM Thursday / Friday	2 days
Satellite Meetings Saturday / Sunday	2 days
B2GM Monday – Friday	5 days

coming meeting:

KEK	VXD Mechanics Gemba	Oct. 17
KEK	BEAST 2 mini workshop	Oct. 18
KEK	B2GM	Oct. 19 – 23
KEK	VXD – BPAC	Oct. 24 - 26

B2BM & BPAC in October

Presentations during BPAC (subset for B2GM -> Peter Krizan)

VXD:	VXD Installation	David Kittlinger (CK@BPAC)
	VXD Services	Christian Kiesling
	RVC	Karsten Gadow
	Thermal Test	Carsten Niebuhr
	CO2 Cooling	Hans-Günther Moser
	BEAST Phase 2	Carlos Marinas
PXD:	Overview, Issues, Schedule	Christian Kiesling
	PXD9 Production	Jelena Ninkovic
	ASICs	Laci Andricek (for Ivan P.)
	PXD Assembly	Laci Andricek
	Ladder Production, QA, QC	Christian Koffmane
	Slow Control	Thorsten Röder
	[DAQ	Sören Lange]
