

ONSEN at DESY test beam September 2016

- 4th of October start of Detector integration
 - during that week installation of DHP, DHE etc. solving of trigger shift problem
 - maybe ONSEN should come after that
- This time ONSEN will have more error detection during runtime
 - Interrupts and Unpacker DQM
 - for unpacker DQM iam in contact with Konno-san, to have histograms live updated in CSS
 - still not clear so far how this errors convert to CSS alarms (Santander)
- ONSEN cold start this time hopefully with bitstream in CPLD
 - direct reprogramming after power cycle
 - if not there is still this button

- As far as I know the Hardware will this time be placed in the big ATCA shelf
