DHE firmware

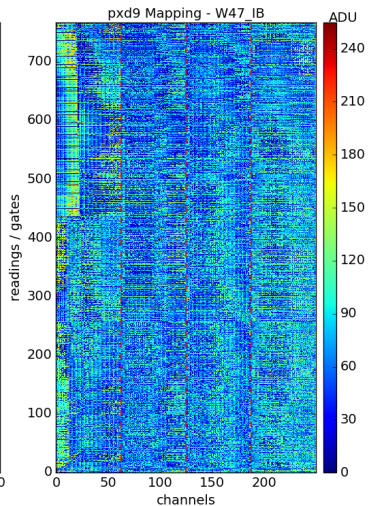

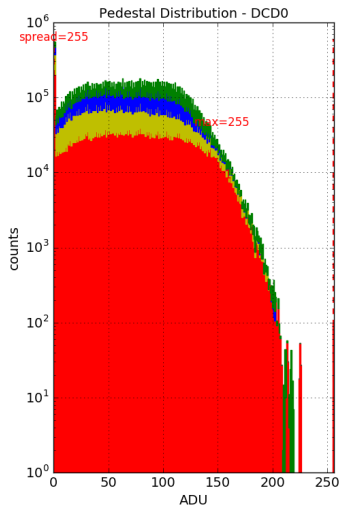

- used so far: 17621220, 0x116AD80
- new one: 17871528, 0x1183BDC

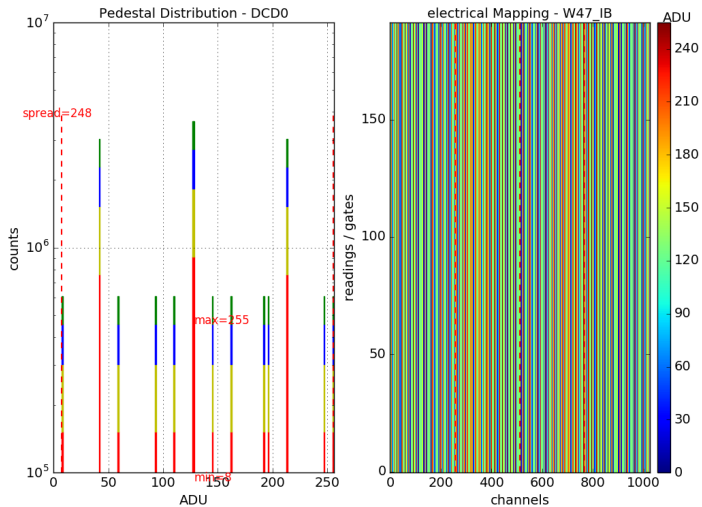

change in trg_en

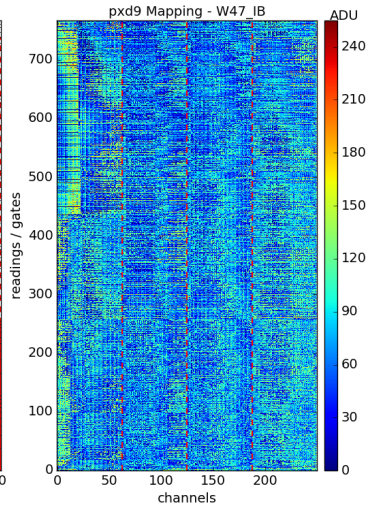

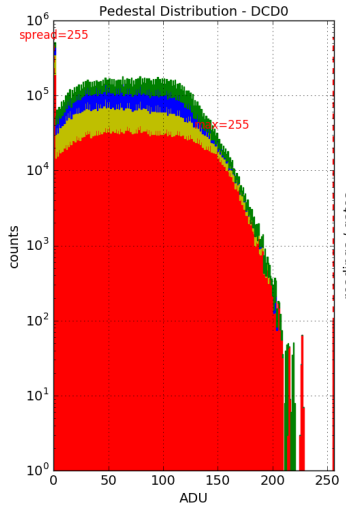

trg_en has to be set to 1 to receive data (also for memdump)

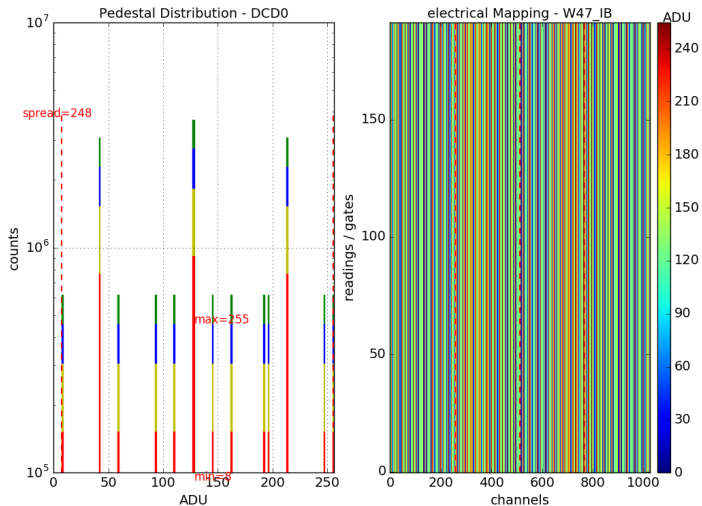

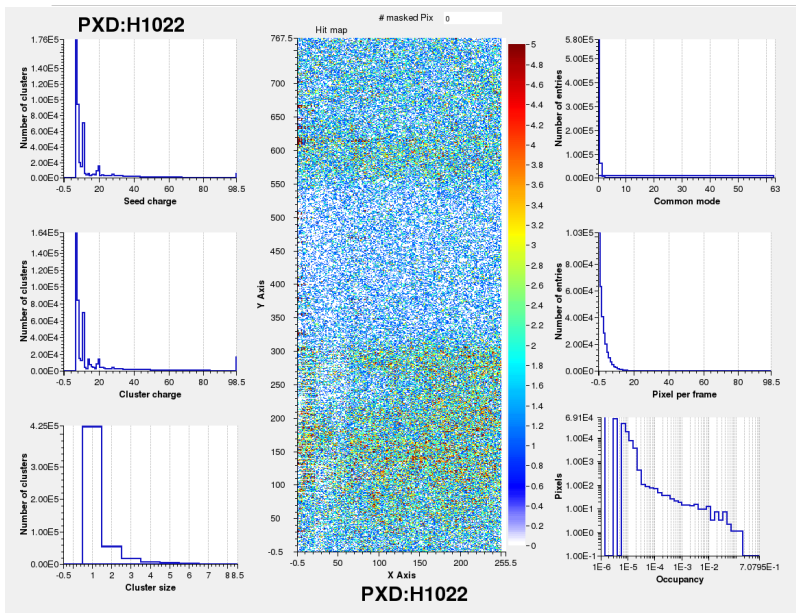

- W47_IB
- power up with complete configuration (incl. offsets upload)
- taking pedestals
- taking test pattern
- source hits in online monitor
- adc curve scan
(gate as source, just one parameter point, not correctly plotted)

channel0245_dacipsource-075_dacipsource2-060__reduced_range
