

Hot Topics in Particle and Astroparticle Physics 2004

Friday, 29 October 2004

Morning (08:00 - 14:00)

| time | [id] title | presenter |
|-------|---|------------------|
| 08:00 | Breakfast | |
| 09:00 | [23] Lecture Renormalons II | ANDRE HOANG |
| 09:05 | [24] Quenching Factor Measurements for the CRESST Experiment | JELENA NINKOVIC |
| 09:10 | [28] Black Hole Mass Decreasing due to the Phantom Energy Accretion | EUGENY BABICHEV |
| 09:15 | [25] The next-to-lightest Neutralino Decay at LHC | QINGJUN XU |
| 09:20 | [26] Radiation Hardness of HEC-Electronics | EMANUEL RAUTER |
| 09:25 | [27] Detection of Gamma Ray Bursts with the MAGIC Telescope - A Feasibility Study | SATOKO MIZOBUCHI |
| 10:40 | Coffee Break | |
| 12:30 | Lunch | |
