

Status of BOS/F MDT Chamber Construction

- ❑ 88 chambers + 12 spares + 106 supports to be built.
 - ❑ 87 chambers + 12 spares chambers glued.
 - ❑ 77 chambers + 10 spares complete with final electronics.
 - ❑ 68 chambers at CERN.
 - ❑ 43 chambers integrated with RPC at CERN, 4 installed.
 - ❑ 79 chambers + 10 spares tested at LMU.
 - ❑ 77 chambers + 10 spares tested with final electronics.
 - ❑ 90 common supports assembled, 78 at CERN, 10 installed.
-

- ❑ 1 chamber to be glued.
- ❑ 6 chambers to be assembled with gas system.
- ❑ 11 chambers to be assembled with final elec.
- ❑ 11 chambers to be tested at LMU.
- ❑ 45 chambers to be integrated with RPCs at CERN.

14	1200		GTE		1920		GTEI	GTEI		GTE		GTE		GTE

2160, 1920, 1440, 1200 mm = glued

G = Gas system mounted

GT = tested with prelim. electronics

GTE = tested with final electronics

GTEI = integrated with RPC

Schedule

- Installation sectors 2-8 November/December 2005
- Installation sectors 12&14 and 10&16 first quarter 2006
- Chamber integration at CERN until March 2006,
start of commissioning in ATLAS
- Chamber construction until end of this year
- Chamber test at LMU until January 2006

Muon Spectrometer Calibration & Alignment Center

Tasks:

- ❑ t_0 calibration: 10000 hits/tube.
- ❑ r-t calibration: 10000 track segments/calibration region, 10000 calibration regions/ 5500 m² chamber area, temperature, B field, background rate corrections.

Recalibration once per day with muon rate 10⁸ /day, data stream of 2.5 kHz x 1 kByte to dedicated calibration centers associated with Tier 2.

- ❑ Quasi-online track-based alignment of muon spectrometer, internal and w.r.t. inner tracker, every 2 h with the same data stream.

Proposal for 3 calibration centers: Rome, Michigan, Munich. About 100 CPUs and 4 FTE per center (shared by LMU&MPI).
